## EXPERIENCE

### WORKDAY

PLEASANTON, CALIFORNIA

Software Development Engineer III

May 2022 - Present

Software Development Engineer II

June 2019 - April 2022

Built a responsive calendar for requesting time off with custom focus management and screenreader support in React

Built a hidden skip link accessible via keyboard throughout the Workday HCM application

Built an accessible dropdown menu for configuring table column order, visibility, and freeze state

Building a complete redo of the Workday's org chart for visualizing organization hierarchy and team structures using React, Redux Toolkit (with RTK Query), and React Spring

Improved unit and visual testing by adding extensive data mocking and modern patterns to Storybook

Gave talks on calendar accessibility at the Bay Area Accessibility and Inclusive Design Meetup and calendar architecture and design at a company organizational conference

Led developing for accessibility internal trainings

### INFOSYS LTD.

PALO ALTO, CALIFORNIA / REMOTE

Senior Associate Software Engineer

April - June 2019

Associate Software Engineer

July 2017 - March 2019

Responsible for development on a connected React and Redux project

Maintained an AngularJS project

### INTEL CORPORATION

FOLSOM, CALIFORNIA / REMOTE

Software Engineer Intern

June - December 2016

Developed a desktop application using wxPython for hardware testing tools used internally as an alternative to an existing command line interface application
